

News from Friends of Victoria Park

Stepping Stones

32 mosaic stepping stones and a pointer sign for the wildlife garden have been designed and created by members of Stretford's community and the beavers and cubs that are based within the park. These stones will be embedded into the ground and will lead you through the wildlife garden. We have also been able to buy a new wildlife information board with this grant which will be able to inform all about what you might see in this area especially in our new ponds.
